CONTENTS

Editorials
Dedication to Wolfgang Schlager
D. Bernoulli 1
Sedimentology in the 21st century—a tribute to Wolfgang Schlager
J.J.G. Reijmer and A. Immenhauser 3

1. Cenozoic
1.1. Overviews and concepts
Disobedient sediments can feedback on their transportation, deposition and geomorphology
R.N. Ginsburg 9
Global change and modern coral reefs: New opportunities to understand shallow-water carbonate depositional processes
P. Hallock 19
The transient nature of the empty bucket model of reef sedimentation
E.G. Purdy and E. Gischler 35
A genetic classification of carbonate platforms based on their basinal and tectonic settings in the Cenozoic
D. Bosence 49
Accumulation rates from well-dated late Neogene carbonate platforms and margins
D.F. McNeill 73

1.2. Caribbean
The modern calcifying sponge *Spheciospongia vesparium* (Lamarck, 1815), Great Bahama Bank: Implications for ancient sponge mud-mounds
F. Neuweiler and D.J. Burdige 89

The nature of the $\delta^{13}C$ of periplatform sediments: Implications for stratigraphy and the global carbon cycle
P.K. Swart and G. Eberli 115
The use of paleoceanographic proxies in carbonate periplatform settings—opportunities and pitfalls
L. Reuning, J.J.G. Reijmer, C. Betzler, P. Swart and T. Bauch 131
Controls on modern carbonate preservation in the southern Florida Straits
J. Schwarz and R. Rendle-Bühring 153

1.3. Cool water
Cool-water carbonate sedimentology and eustasy; Pleistocene upper slope environments, Great Australian Bight (Site 1127, ODP LEG 182)
C. Betzler, S. Saxena, P.K. Swart, A. Isern and N.P. James 169

1.4. Seismic sedimentology
Development patterns and controlling factors of Tertiary carbonate buildups: Insights from high-resolution 3D seismic and well data in the Malampaya gas field (Offshore Palawan, Philippines)
F. Fournier, J. Borgomano and L.F. Montaggioni 189
Well log and seismic character of Liuhua 11-1 Field, South China Sea; relationship between diagenesis and seismic reflections
V. Zampetti, U. Sattler and H. Braaksma 217

1.5. Drowning
Evolution of the Northern Nicaragua Rise during the Oligocene–Miocene: Drowning by environmental factors
M. Mutti, A.W. Droxler and A.D. Cunningham 237

1.6. Carbonates and clastics
Shelf-geometry response to changes in relative sea level on a mixed carbonate–siliciclastic shelf in the Guyana Basin
A.E. Campbell 259

2. Mesozoic
2.1. Concepts
High-rate sea-level change during the Mesozoic: New approaches to an old problem
A. Immenhauser 277

2.2. Case studies
Basin-to-platform chemostratigraphy and diagenesis of the Early Cretaceous Vercors Carbonate Platform, SE France
B.W. Fouke, W. Schlager, M.G.M. Vandamme, J. Henderiks and B. Van Hilten 297
Late Cretaceous heterozoan carbonates: Palaeoenvironmental setting, relationships with rudist carbonates (Provence, south-east France)
J.M. Philip and J. Gari 315
Facies architecture and high-resolution sequence stratigraphy of an Upper Cretaceous platform margin succession, southern central Pyrenees, Spain
L. Pomar, E. Gili, A. Obrador and W.C. Ward 339
Fringing carbonate platforms at the Arabian Plate margin in northern Oman during the Late Aptian–Middle Albian: Evidence for high-amplitude sea-level changes
B. Gréselle and B. Pittet 367
Integrated sequence stratigraphy: Facies, stable isotope and palynofacies analysis in a deeper epicontinental carbonate ramp (Late Jurassic, SW Germany)
M. Ruf, E. Link, J. Pross and T. Aigner 391
Meso-/Cenozoic basin and carbonate platform development in the SW-Dolomites unraveled by basin modelling and apatite FT analysis: Rosengarten and Latemar (Northern Italy)
A. Emmerich, U.A. Glasmacher, F. Bauer, T. Bechstädt and R. Zühlke 415

Meso-/Cenozoic basin and carbonate platform development in the SW-Dolomites unraveled by basin modelling and apatite FT analysis: Rosengarten and Latemar (Northern Italy)
A. Emmerich, U.A. Glasmacher, F. Bauer, T. Bechstädt and R. Zühlke 415
Accommodation/sedimentation development and massive early marine cementation: Latemar vs. Concarena (Middle/Upper Triassic, Southern Alps)
M. Seeling, A. Emmerich, T. Bechstädt and R. Zühlke 439
Quartz cementation and related sedimentary architecture of the Triassic Solling Formation, Reinhardswald Basin, Germany
J. Weber and W. Ricken 459

3. Palaeozoic

3.1. Case study

Drowning of the Upper Marble Falls carbonate platform (Pennsylvanian), central Texas: A case of conflicting "signals?"
R.N. Erlich and J.L. Coleman Jr. 479
